

PrimeSlitter BlackLine CHRO

The new dimension for your next level production
Maximum performance and modularity

The benchmark in primary slitting

Universal applications for flexibility and output.

Markets and customer demands are constantly evolving — and with them, the need to boost overall efficiency. When it comes to film conversion, individual solutions are key. **With the new, trendsetting PrimeSlitter, you're perfectly equipped to meet your challenges.**

**PrimeSlitter BlackLine CHRO •
NEW PrimeSlitter BlackLine CHRO**
The most important specifications at a glance.

Material	BOPP, BOPET, BOPE
Material thickness	8 - 125 µm
Material width	max 12,800 mm
Original roll diameter	max. 2,050 mm
Finished roll diameter	max. 1,250 mm • optional 1,500 mm
Finished roll weight	max. 7 t
Slitting system	Razor blade cut / Burst cut
Slitting width	max. 4,200 mm
Winding cores	3" / 6" / 8" / 10"
Machine speed	max. 1,250 m/min • optional 1,500 m/min

Your advantages at a glance

- ✓ Patented anti-tin-canning system
- ✓ Precise individual drive technology
- ✓ High throughput without compromising quality
- ✓ Web control function

We support you throughout the entire lifecycle of your machines with our Lifecycle Services.

Faster ramp-up – More throughput

A new set of web control functions helps your operators reach the desired quality level faster – with enhanced sustainability.

Flexible Films // PrimeSlitter BlackLine CHRO

PrimeSlitter BlackLine CHRO

The new dimension for your next level production • Maximum performance and modularity

Maximum performance meets Flexibility

We combine proven core technologies with smart, future-ready solutions – **delivering maximum performance where it matters most.**

Tailored to your film specifications and production line, the PrimeSlitter is configured to ensure top throughput and excellent quality.

Our modular solution packages help you achieve your goals efficiently and profitably.

- Reduce set-up times
- Simplify operation
- Boost quality
- Make smart use of data

Whatever your challenge — we have the right solution and support you throughout the entire lifecycle of your machines with our Lifecycle Services.

Uptime is the focus

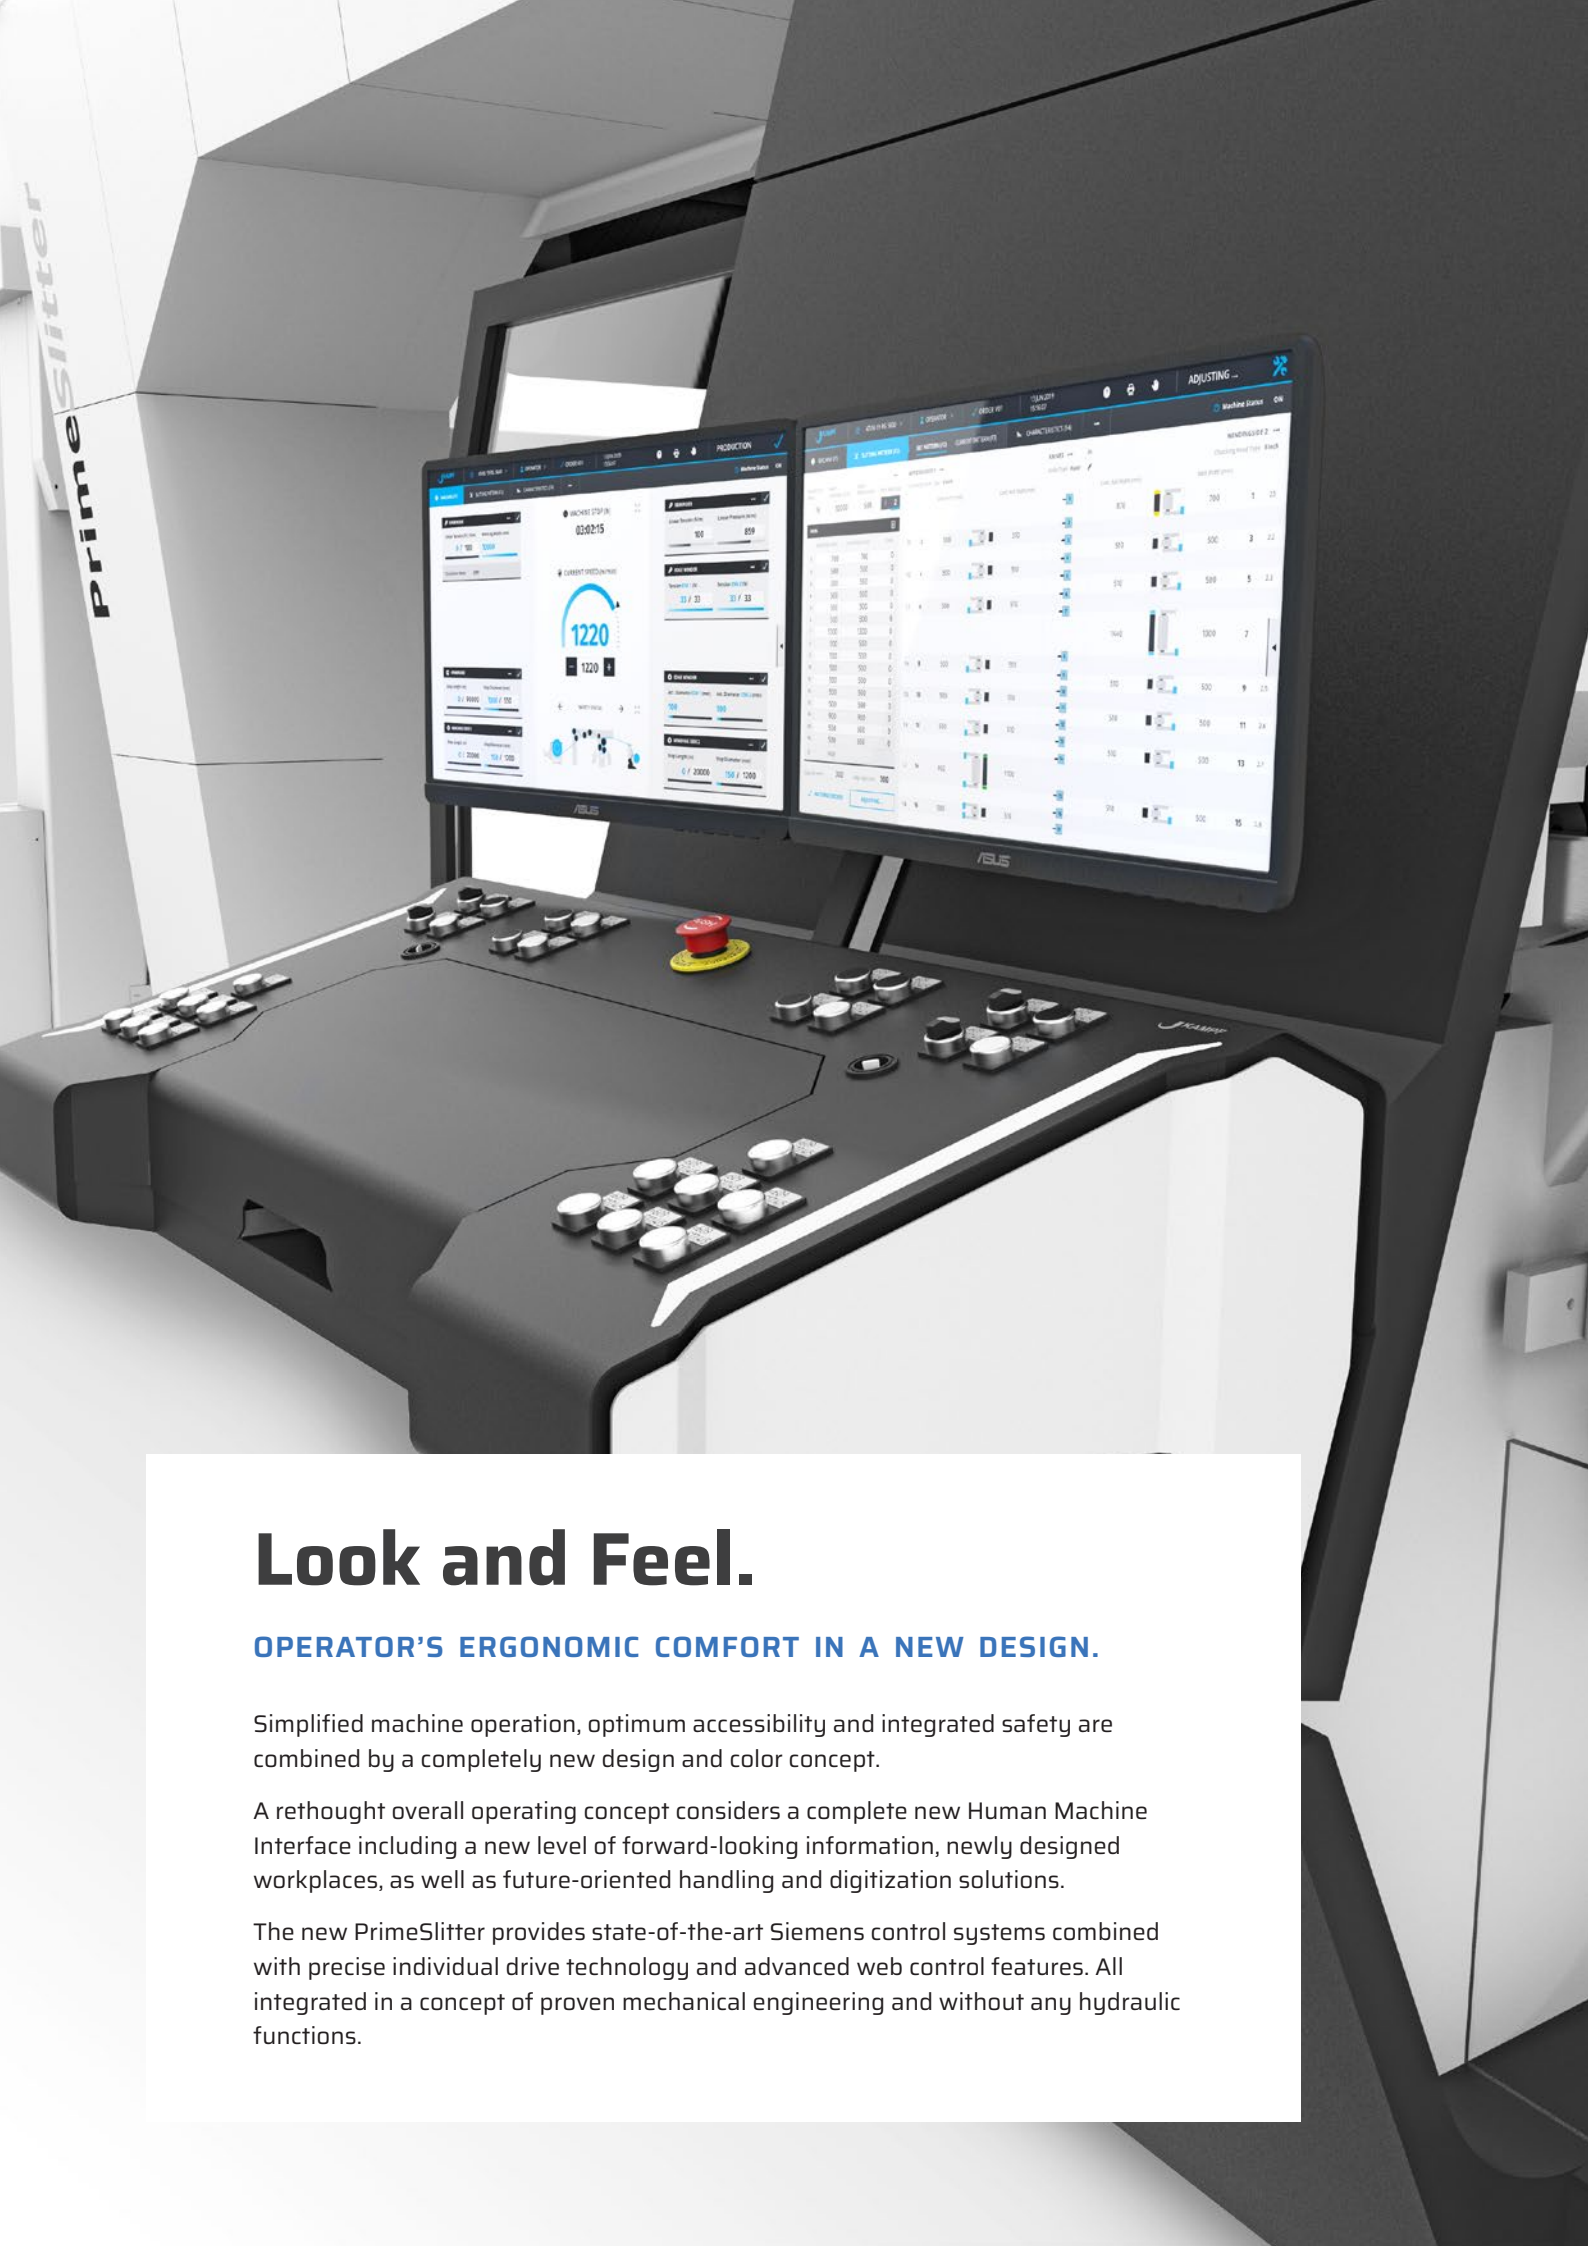

Change Settings – The Smart Way to Save Time and Improve Ergonomics

Discover new embeddable solutions designed to simplify handling and reduce changeover times for:

- Chucking heads
- Contact rollers
- Slitting tools
- Finished rolls

Heavy loads – Fast and safe handling

Save up to 30% of valuable time when changing parent rolls. Our integrated solution for parent roll handling, core exchange, and splicing reduces crane dependency and increases safety.

Look and Feel.

OPERATOR'S ERGONOMIC COMFORT IN A NEW DESIGN.

Simplified machine operation, optimum accessibility and integrated safety are combined by a completely new design and color concept.

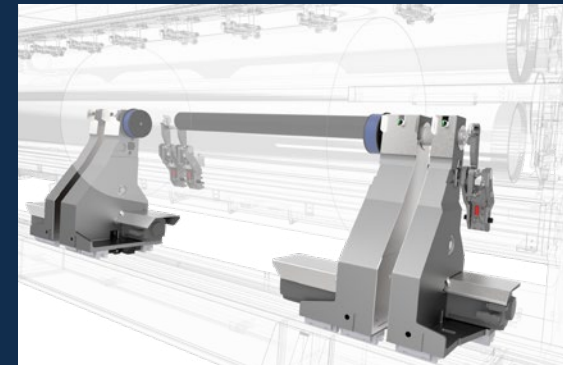

A rethought overall operating concept considers a complete new Human Machine Interface including a new level of forward-looking information, newly designed workplaces, as well as future-oriented handling and digitization solutions.

The new PrimeSlitter provides state-of-the-art Siemens control systems combined with precise individual drive technology and advanced web control features. All integrated in a concept of proven mechanical engineering and without any hydraulic functions.

Flexible Films // Equipment options

A modular system

CUSTOMIZED FOR YOUR APPLICATION

Anti-tin-canning System (patent pending)

The smart performance package to achieve higher production speeds for wide rolls. Speed increase up to 30%.

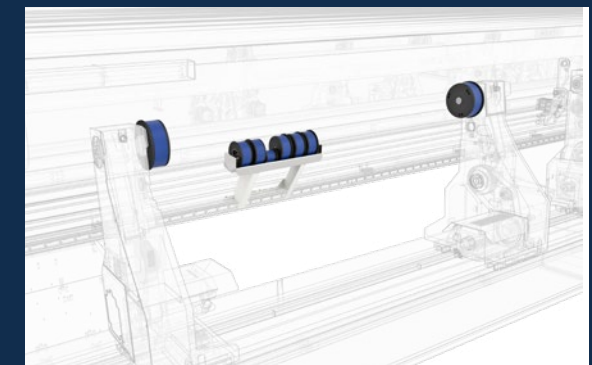

Contact roller handling and position indication

Useful support for easier and safer workflows.

Chucking head

The new quick clamping system for chucks enables tool-free replacement in a matter of seconds.

Chucking head handling

Have your hands free for a quick and orderly process.

Splicing table

New time-saving and operator-friendly splicing table saving up to 30% downtime.

Automation

We offer high efficient automation solutions for optimum use of your PrimeSlitter.

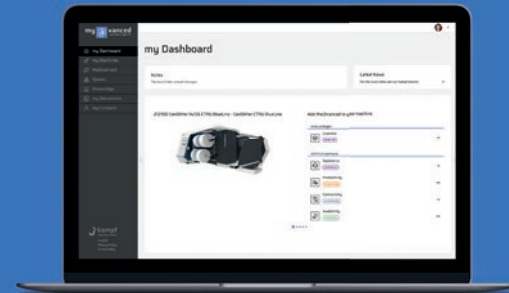

DIGITAL CUSTOMER SOLUTIONS

The digital **customer portal my@vanced** and the **integrative platform the@vanced** make change accessible: with digital collaboration, intelligent production, and continuous evolution of know-how.

Connecting
people.
Integrating
machines.

my @ vanced
customer portal

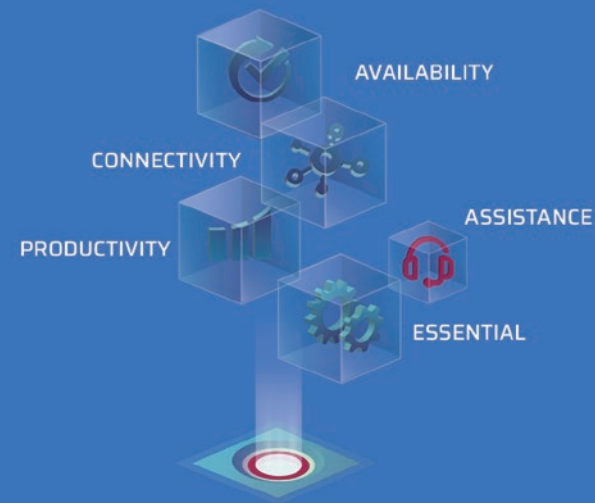

my@vanced is our **digital customer portal**:
Up-to-date information, practical knowledge,
easy spares identification, online shop, and the
certainty to have all necessary **information in**
one place – at any time.

NEXT GENERATION
PRODUCTION

the @ vanced
integrative platform

the@vanced is our digital
integrative platform. It connects
value chain systems in the field
of webshaped materials pro-
cessing. With the **five packages**
Essential, Assistance, Availability,
Productivity and Connectivity
it allows scalable solutions from
using our **Remote Service** to a
full integration into existing **MES**
or **ERP systems**.
