

ProSlitter

Station type slitter

ProSlitter CRR0 BlackLine

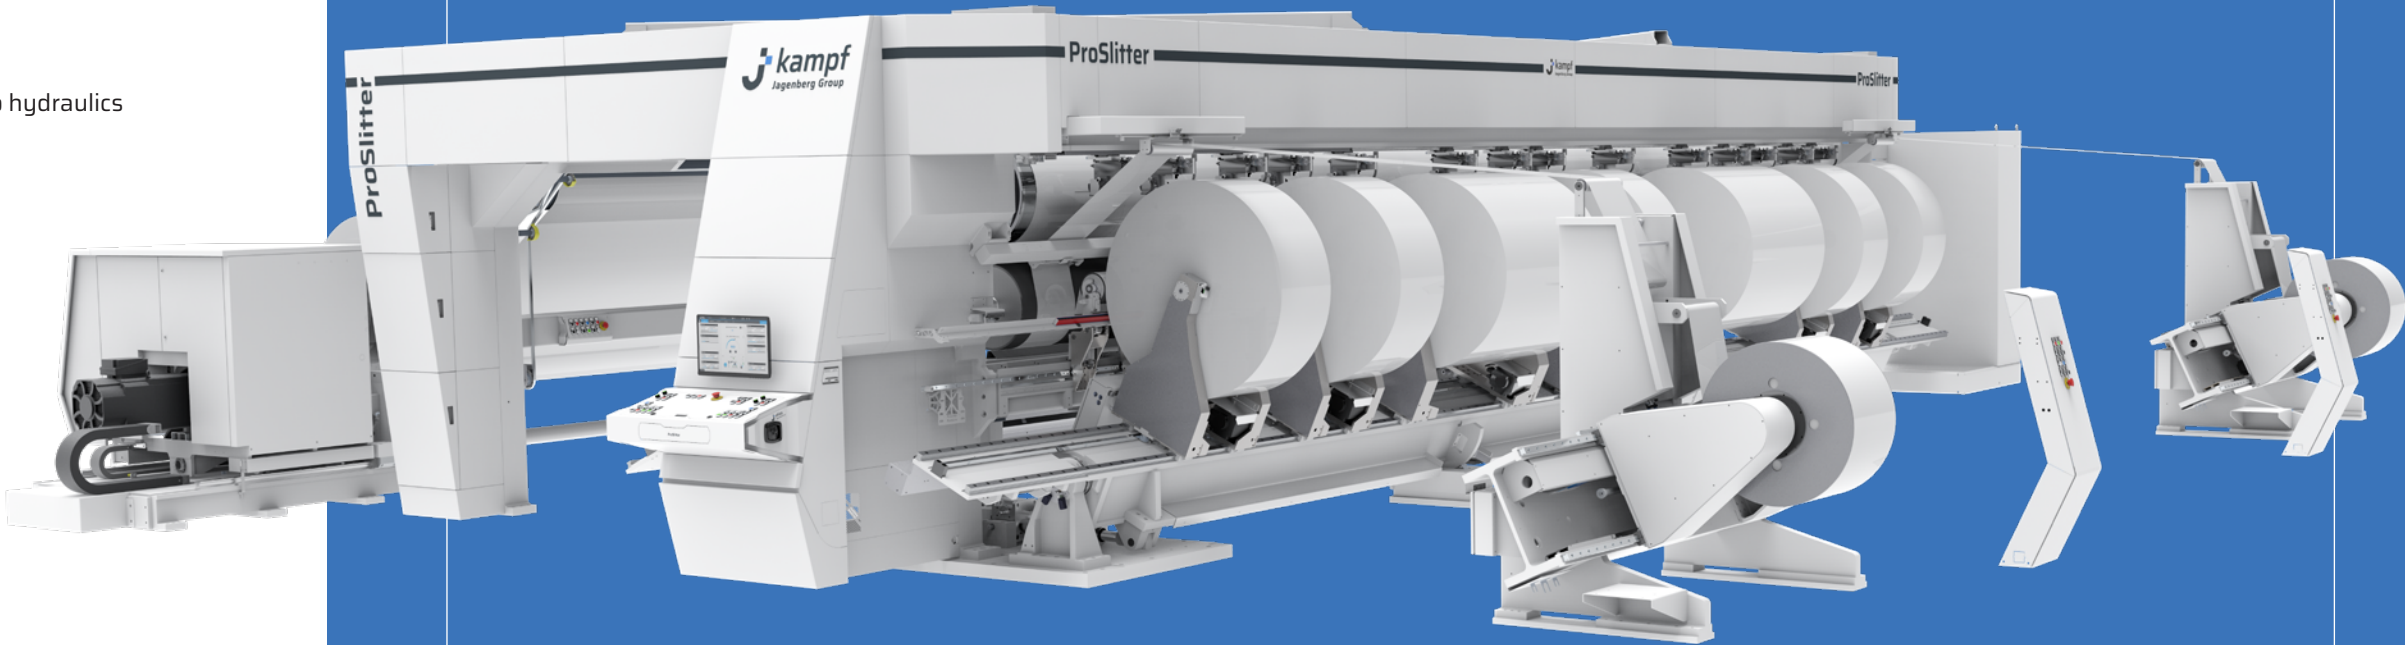

The new ProSlitter series consisting of BlackLine, BlueLine and SilverLine is the new standard in productive slitting of flexible films.

Succeeding the well proven Atlas CW and Kampf Universal series, ProSlitter marks the new era of highly efficient slitting machines for commodity films.

BEST OF BOTH WORLDS

The new ProSlitter BlackLine unites the many decades of slitting expertise of Kampf and Atlas.

- **Clean production** – fully electric machine, no hydraulics in unwinding and rewinding section
- **Electric knife holders** – fully automatic, fast and highest knife position accuracy
- **Easy mount system for contact rolls** – an integrated roll out rail for fast and operator-friendly exchange of contact rolls

Performance and productivity.
A definite strength of your **ProSlitter**.

Technical Data

Materials
BOPP, BOPE, BOPET

Material thickness
8 - 125 µm

Material widths
8,300 · 8,700 · 10,600 mm

Parent roll diameters
1,600 · 1,800 mm

Parent roll weights
20 · 27 tons

Finished roll diameters
1,270 · 1,500 mm

Finished roll weights
2 · 3 · 5 tons

Slitting systems
Razor blade cut in groove ·
burst cut in groove

Sitting widths
310 – 4,000 mm

Winding cores
3" · 6" · 8" · 10"

Machine speed
1,250 · 1,500 m/min

Faster ramp up – more output

A new set of web control functions supports your production staff to achieve the required quality level faster along with sustainability.

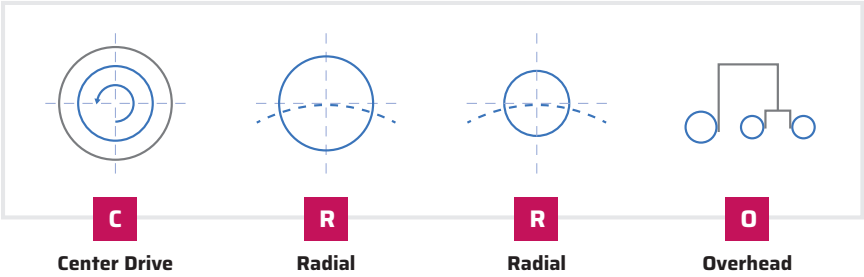

Fully electric slitting unit

The fully electric slitting unit operates without pneumatic or hydraulic components, guaranteeing a clean and safe process with reduced maintenance time.

Productivity is the focus. The sum of solutions makes the difference.

Change settings – The clever way to save time and improve ergonomics with new embeddable solutions for:

- Chucking heads
- Contact roller
- Finished roll trays
- Set-up information

10,600 mm
max. material width

1,500 m/min
max. machine speed

Look and Feel.

OPERATOR'S ERGONOMIC COMFORT IN A NEW DESIGN.

Simplified machine operation, optimum accessibility and integrated safety are combined by a completely new design and color concept.

The redesigned operation concept considers a complete new Human Machine Interface including a new level of forward-looking information, newly designed workplaces, as well as future-oriented handling and digitization solutions.

The new ProSlitter provides state-of-the-art Siemens control systems combined with precise individual drive technology and advanced web control features. All integrated in a concept of proven mechanical engineering and without any hydraulic functions.

Standard range of Options.

INCREASING YOUR LEVEL OF PRODUCTIVITY.

Splicing table

The new ergonomically designed optional splicing table eases the connection of webs

Easy mount system for contact rolls

An integrated roll out rail for fast and operator-friendly exchange of contact rolls

Chucking head

The new quick clamping system for chucks enables tool-free replacement in a matter of seconds

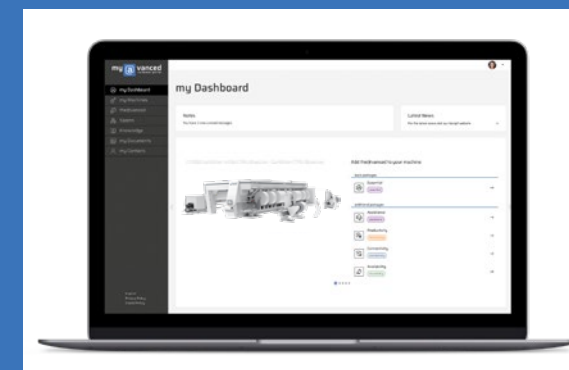

Winding stations

For up to 5 tons finished roll weight up to 1,500 mm diameter

Edge trim winders

Optional safe removal of film trim for trouble-free production

Optional my@vanced and the@vanced

Make change accessible

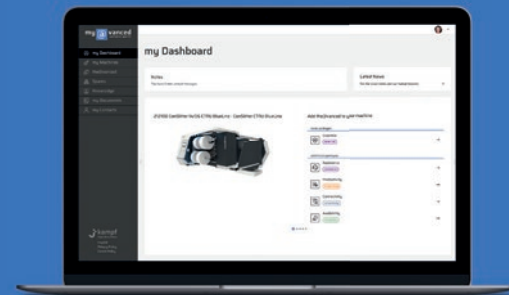

DIGITAL CUSTOMER SOLUTIONS

The digital **customer portal my@vanced** and the **integrative platform the@vanced** make change accessible: with digital collaboration, intelligent production, and continuous evolution of know-how.

Connecting
people.
Integrating
machines.

my @ vanced
customer portal

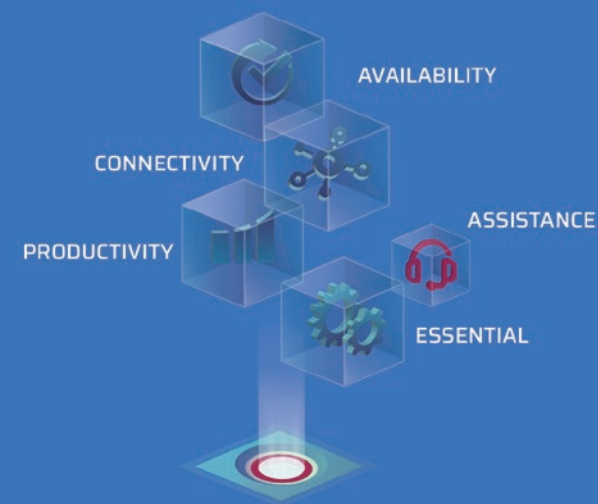

my@vanced is our **digital customer portal**:
Up-to-date information, practical knowledge,
easy spares identification, online shop, and the
certainty to have all necessary **information in**
one place – at any time.

NEXT GENERATION
PRODUCTION

the @ vanced
integrative platform

the@vanced is our digital
integrative platform. It connects
value chain systems in the field
of webshaped materials pro-
cessing. With the **five packages**
Essential, Assistance, Availability,
Productivity and Connectivity
it allows scalable solutions from
using our **Remote Service** to a
full integration into existing **MES**
or **ERP systems**.
